## Children with Disabilities and Special Dietary Needs

Schools/Sites participating in a federal school meal program (National School Lunch Program, School Breakfast Program, Child and Adult Care Food Program, Summer Food Service Program, Fresh Fruit and Vegetable Program, Special Milk Program, and Afterschool Snack Program) are required to make reasonable accommodations for children who are unable to eat the school/site meals because of a disability that restricts the diet.

### 1. Licensed Medical Authority's Statement for Children with Disabilities

U.S. Department of Agriculture (USDA) regulations at [7 CFR Part 15b](#) require substitutions or modifications in school/site meals for children whose disabilities restrict their diets. School Food Authorities/Sponsors must provide modifications for children on a case-by-case basis when requests are supported by a written statement from a state licensed medical authority.

The third page of this document ("**Medical Plan of Care for School/Site Food Service**") may be used to obtain the required information from the licensed medical authority. For this purpose, a *state licensed medical authority* in West Virginia includes a:

- Physician, (MD or DO)
- Physician assistant,
- Certified registered nurse practitioner, or
- Dentist.

#### The written medical statement must include:

- An explanation of how the child's physical or mental impairment restricts the child's diet;
- An explanation of what must be done to accommodate the child; and
- The food or foods to be omitted and recommended alternatives, if appropriate.

### 2. Other Special Dietary Needs

School/Site Food Service Staff may make food substitutions for individual children who do not have a medical statement on file. Such determinations are made on a case-by-case basis and all accommodations must be made according to USDA's meal pattern requirements. Schools/Sites are encouraged to have documentation on file when making menu modifications within the meal pattern.

### 3. Rehabilitation Act of 1973 and the Americans with Disabilities Act

Under Section 504 of the *Rehabilitation Act of 1973*, the *Americans with Disabilities Act (ADA) of 1990* and the *ADA Amendments Act of 2008*, a person with a disability means any person who has a physical or mental impairment that substantially limits one or more major life activities or major bodily functions, has a record of such an impairment, or is regarded as having such an impairment. A physical or mental impairment does not need to be life threatening in order to constitute a disability. If it limits a major life activity, it is considered a disability.

*Major life activities* include, but are not limited to: caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, and working. A major life activity also includes the operation of a major bodily function, including but not limited to: functions of the immune system; normal cell growth; and digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions.

#### 4. Individuals with Disabilities Education Act

A child with a disability under Part B of the *Individuals with Disabilities Education Act* (IDEA) is described as a child evaluated in accordance with IDEA as having one or more of the recognized thirteen disability categories and who, by reason thereof, needs special education and related services. The Individualized Education Program (IEP) is a written statement for a child with a disability that is developed, reviewed, and revised in accordance with the IDEA and its implementing regulations. When nutrition services are required under a child's IEP, school officials need to ensure that food service staff is involved early in decisions regarding special meals.
